

Extraordinarily efficient refrigerator/freezers which use less than half of the power of standard models.

For all models the condenser and cooling tubes are built into the walls of the unit, resulting in lower energy consumption. The back is sealed so no dust collects on the working parts, improving efficiency, and ensuring very quiet operation. Refrigerant and foam used in all models is "ozone friendly", meeting the strict European standards for recyclability.

UPRIGHT REFRIGERATOR/FREEZER

The fresh food section is located above the freezer - convenient, easy to clean, no bending over to get at the most commonly used foods.

- Twin compressor design
- Stainless and colour fronts available
- Flexible door shelf arrangement
- Fast-freeze button and lamp
- Unit can be built-in
- Automatic defrost
- Freezer section has defrost water outlet (pull-out) for manual defrost
- Left or right hand door opening
- Refrigerator section has interior/exterior light
- Combination of pull-down drawers and fast-freeze shelves

Specifications

	BSKF375	BSKF352
Net capacity - fridge/freezer	200/96 litres	167/96 litres
Height/Width/Depth (excl handle)	201/60/60 cm	186/60/60 cm
Freezing capacity	14 Kg	14 Kg
Freezer holdover time (without power) -18°C to -9°C	20 hrs	20 hrs
Power consumption at 25°C ambient	1080 Whr/day	890 Whr/day
Energy consumption kWhr per year	421	396

CHEST FREEZER

Uses less than half the power required by conventional chest freezers without sacrificing features or using CFC foam or refrigerant.

- Laminated steel lid with interior light
- Control panel with fast-freeze switch and lamp
- Partition divider
- Aluminium liner
- Locking handle
- Childproof temperature control
- Electricity-on indicator lamp
- Built-in condenser
- Temperature warning lamp and alarm
- Freezing calendar in lid
- Defrost water drain-hole

Specifications

	SE 165	SE255	SE325
Net capacity - freezer	155 litres	239 litres	312 litres

Number of baskets	1	3	4
Power consumption at 25°C ambient	490 Whr/day	610 Whr/day	710 Whr/day
Holdover time (without power) -18°C to -9°C	44 hrs	50 hrs	52 hrs
Energy consumption kWhr per year	237	302	302

UPRIGHT TWO DOOR REFRIGERATOR

The BSKS360 larger refrigerator is ideal for large storage needs. With two doors you only open the section you want to access, maintaining even temperature in the unopened section of the unit and saving power. Flexible shelving and door options maximise available capacity.

- Adjustable shelves
- Well-arranged childproof control panel with built-in light
- Adjustable feet in front, castors at back
- Reversible doors
- Bottle shelf holds five 1.5 litre bottles
- Removable kick plate permits cleaning underneath.

Specifications

Net capacity	333 litres
Height/Width/Depth	186/60/60 cm
Power consumption at 25°C ambient	460 Whr/day

UPRIGHT SIDE BY SIDE MATCHING REFRIGERATOR AND FREEZER

The upright refrigerator BSK300 and the BSFS225 freezer, available either individually or as a matched pair, incorporate all of the features listed above for the BSKS360 fridge and the combination fridge/freezer models

Specifications
